Portfolio Storyboard & Design Assets

CIT2011 Individual Assignment 1 • Documentation draft based on the current portfolio design

Purpose

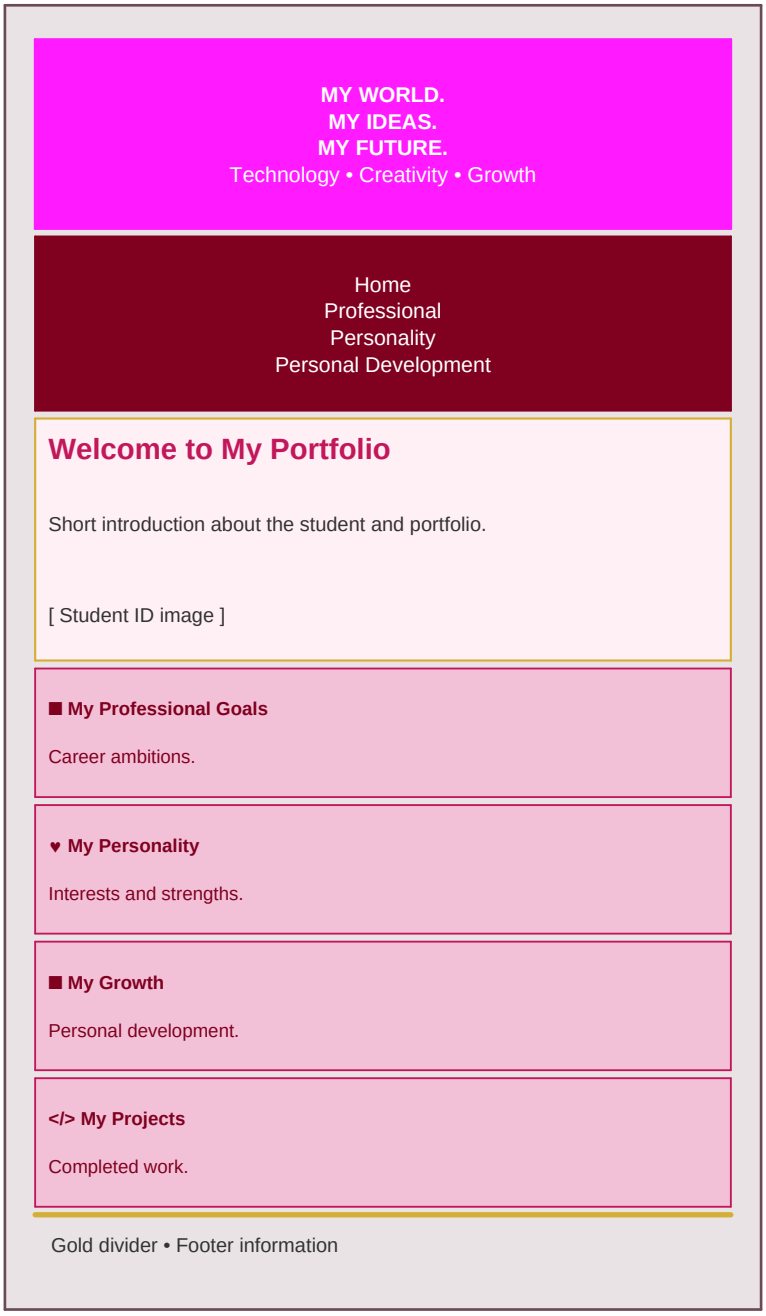
This document records two planned layouts for the personal portfolio website and lists the main design assets. The storyboard reflects the current design direction: pale-pink page background, burgundy headings, a bright-pink hero banner, gold dividers, and four pink feature cards. Compare these diagrams with the final webpages and update the document if the website changes.

1. Desktop storyboard (minimum layout width: 950 px)

Desktop behaviour: the four feature cards sit in one horizontal row when enough width is available. Navigation appears as a single horizontal line. Content uses the full page width with consistent spacing.

2. Mobile storyboard (minimum layout width: 600 px)

The mobile layout stacks content vertically to avoid squeezing text and cards. At the assignment's stated minimum mobile width of 600 px, the content remains readable and the cards may form two columns or stack depending on the final CSS.



Mobile behaviour: the banner text wraps over multiple lines; navigation links are stacked; the welcome content and feature cards appear in a vertical flow; images scale down to fit the viewport.

3. Design assets and specifications

Colour palette

Colour	HEX	RGB	Planned use
Burgundy	#800020	128, 0, 32	Main headings and links
Dark pink	#C2185B	194, 24, 91	Secondary headings and hover accents
Bright pink	#FF1AFF	255, 26, 255	Hero/banner background
Pale pink	#FFF0F5	255, 240, 245	Page background
Card pink	#F3C1D7	243, 193, 215	Feature-card backgrounds (approximate from current design)
Gold	#D4AF37	212, 175, 55	Horizontal dividers and accent lines
Dark grey	#333333	51, 51, 51	Body text

Typography, icons, and image assets

Asset / property	Specification
Font family	Georgia, serif (website body and headings, as currently styled).
Root/body font weight	400 (normal) unless overridden by a heading or bold element; headings are typically 700 (bold). Confirm in style.css
Navigation	Home, Professional, Personality, Personal Development; burgundy/dark pink styling, with bright-pink banner style us
Feature icons	■ Professional Goals; ♥ Personality; ■ Growth; </> Projects. These are simple text/emoji-style icons.
Student ID image	File: Assets/utech-id.jpeg. The current HTML uses width="200"; the CSS layout may reduce it responsively. Conside
Desktop target	Minimum 950 px layout width per assignment instructions.
Mobile target	Minimum 600 px layout width per assignment instructions; cards and navigation stack vertically.
Page layout	Four HTML pages: index.html, professional.html, personality.html, personal-development.html; shared stylesheet sty

Before submission: compare both storyboard layouts against the actual site at desktop and mobile widths; replace approximate card colour or image dimensions with exact values from style.css and index.html; then include this PDF and the source assets in the GitHub repository.
